

FAA Safety Team and Boston FSDO presents:

**Seminar Series by Marc Zeitlin aeronautical engineer and Cozy
builder pilot**

Marc Zeitlin, aeronautical engineer, Cozy builder/pilot, and former program manager of the Tier 1B (SS2) rocket motor rocket motor program will cover a range of topics:

1. Bad Judgement -- How is it possible for one person to make 13 major judgmental errors on a cross-country trip and live to tell about it?
2. WOW!, you've actually been FLYING that thing? We can try VERY hard to avoid these issues in OUR aircraft (none of which, of course, are below average)
3. Tier 1B (SS2 – aka SpaceShipTwo) update We'll cover the Spaceship, Mothership and Rocket Motor development, as well as the two accidents and Virgin Galactic's current program status.
4. Prop Loss, Desert Center (the propeller decided to take a different route to the ground)
5. Belleville Washer Installation and Testing After our prop loss, research indicated that this event is hardly as uncommon as we'd all like it to be (for those of us with wood and composite propellers) See complete description in additional info.
